

Katy 1st Ward Spiritual Message #51

The best way to be prepared is to be prepared!

That may sound silly to even say, but let's face it, emergency preparedness is something we often put off. For some of us, doesn't seem like a very high priority until it is too late to prepare. When there is a disaster in progress is no time to be buying emergency water or trying to find a generator at Home Depot. Two weeks ago the Bishop passed out a booklet on emergency preparedness. Hopefully everyone got one. Today we came very close to having a category 1 hurricane come directly over us. Just a little more movement in that second low front and it would have come further west. Hopefully this will be the stimulus we all need to start making serious plans to get prepared and stay prepared.

While I was living in the Seattle area I was a part of the Pierce County Emergency Preparedness Organization there. As a part of that assignment I prepared a web page that has a ton of information about emergency preparedness. The web page is still up if you care to look at it. You can find it at:
