Purification Does What Chemicals Can Not For Fleas

Tracy Slavitsky

I was ecstatic when I found out that Purification could be used as a flea & tick preventative. Not only did I dislike putting Frontline on my dogs (nervous of the chemicals) but that stuff is so expensive. I can use the Purification more often and it's much more cost effective. So far so good, no sight of fleas & ticks! I apply a drop or two between the shoulder blades about once a week during spring & summer and then during fall & winter I apply a drop about once a month. So far I've not seen one tick or flea on either of my dogs.

Ear Mites In Dogs

Shannon Andrews

I am a purebred dog breeder and over the last couple years, we were forced to keep our kennel in a fairly transient area. When we first moved in, our dogs were exposed to an over infested cat population. In turn, they acquired ear mites. At that time, unbeknown to me that other treatments existed, we sought vet advice and utilized some prescription medication from them. Fortunately the cats cleared out as my dogs do not take too kindly to them.....Labradors love a chase, LOL. However, less than a year later, some new dogs came into our kennel in which we queried ear mites. We never

took them to the vet but instead we Googled and found a wonderful ear cleaner made of essential oils. Although the vet never found ear mites in our pups at the time (we had a litter on deck), we did clean all dogs and pups ears at the minimum of twice daily with this wash for at least 10 days. Surprisingly, the dirt and debris wax (normal symptoms of a possible ear mite infestation) in those dogs that appeared infected seemed to disappear and we have not had a problem since.

Today I use the recipe as a regular ear wash as it has a wonderful smell and does such a good job. I only apply it once or twice a month or when prepping dogs for dog shows.

The recipe;

- 1 oz of witch hazel oil or witch hazel astringent (I prefer the astringent)
- 5 drops of Melaleuca Oil
- 5 drops of Clove Oil

Mix together and place a few drops in the dog's ear canal. Massage the ear for at least 30 to 60 seconds to loosen all the wax or ear mite dirt. Then Wipe out with a clean cotton ball. Do this until the ear is clean. And repeat at least twice daily for no less than 10 days.

Please do not use Melaleuca oil on cats as their systems cannot handle this oil.

What To Do When Pets Get Arthritis

Laura Fager My friend's dogs are getting up there in age and they have been suffering from arthritis for a few years. It has slowed them down a lot and they used to walk very slowly. We started giving them half a teaspoon of Sulfurzyme in their food every morning and they have improved a lot. They are able to move more freely and "dance around" more.

What To Do With Pet Odors Doris Haskell

We have three dogs, and have a constant challenge with odors in our rugs and upholstered furniture. I put some baking soda and a few drops of Young Living Purification Essential Oil Blend in a shaker can and shook it well. Then, I scattered it all over the rugs and let it sit for about half an hour. I vacuumed it all up and now I have a very fresh smelling house. I hope this helps you.

Prevented Ringworm Outbreak At The Animal Shelter Stacey Paden

I foster dogs through an animal rescue. While they cover all their vetting expenses, I had one stray come to me on a Saturday night. After checking him over, I found him to have ringworm on his belly. I used Thieves on it, full strength, which I probably should have diluted. He squirmed just for a minute and then was fine after the initial contact. I treated it for two days and it was gone by the third day. I also used Thieves in some coconut oil and massaged that in the other fosters to prevent it from spreading to other dogs. Fortunately there was no outbreak!

Dog Whining And Limping After Play In Yard

Margaret Stafford

My 8 year old female White Shepherd started whining and limping after being in the house from her play with other dogs in back yard. I checked to make sure there weren't any cuts or serious breaks

and determined that the muscle under the left front leg was inflamed and enlarged. Used PanAway and 2 baby aspirins as I had to leave for a funeral. When I returned she was still limping but not whining, so I used more PanAway, the next morning I used some Lemongrass and after that she was fine.

Thieves Mouthwash Cleans Dog Teeth! Kay PopeJust before going to the YL Convention in SLC in June, I noticed 2 of my dogs had really bad plaque on their teeth - so bad that their teeth looked like "wooden" teeth (their back ones). I was very concerned and thought I really needed to get them to a doggy dentist as soon as I got back from the convention. During the convention I learned that Thieves mouthwash would help their condition just by dipping my finger into the mouthwash and then rubbing on their teeth - it worked! And very fast - within a week white was starting to show and I continue to use it. I later had a light bulb moment and thought if it could do that for them just think what it could do for me and coffee/tea stains! I am a firm believer!

Ningxia Red Helped Our Aging Dog Shirley LindsayI have a 15+ year old Shih Tzu that was having trouble walking around - very stiff. I put some Ningia Red in a small bottle with a dropper and give him about three droppers a day. He loves it and knows it makes him feel better. He comes to the refrigerator and waits for me to get it ready for him and takes it easily. He just keeps going and going!

Lemongrass For Fleas On My Dog Sharon SlaybaughOur dog scratched at fleas. I don't want to use the drugs on her this time. I put 2 drops of Lemongrass on the underside of her collar twice a day, and her itching stops. I will spray the carpets as I vacuum all the corners with a few drops of Lemongrass diluted with water.

Sinus Issues On A Rottweiler Kandi Bowers I actually used this on my Rottweiler, it is an even mixture of Eucalyptus, R.C. & Myrtle. My dog has been sneezing and very congested, so I rub the mixture neat on her chest so she has to breathe the aroma. Her sneezing and congestion has definitely decreased and it has only been a few days.

Always consult your veterinarian when in doubt. Use at your own discretion. These testimonials are unique to the person sharing them and not meant to diagnose your dog or animal. Caution: Cats are sensitive to oils
